

I am writing to request that you do not change the Indiana telephone privacy law. Until we were placed on the list it was very frustrating to get calls at night or on the weekends. There was hardly ever a time when we were not annoyed by all of the phone calls. Even businesses that we have a "business relationship" with (like AT&T or the Evansville Courier and Press) would become an nuisance. They would have a "new offer" or some other reason to bother us. If I want to talk to them or take advantage of a new promotion I will call them, I don't want them calling me!

Thank you,
Penny Staples
